

# Kleen-Plus®

## **FLUIDISED BED NEUTRALISERS**

The APL 'N' series neutralisers use a fluidised media bed, which means that backwashing is not required. This makes these units the most economical on the market, with no backwash valving or electricity required. Top up of the media is made easy with our new exclusive removable top cap (see picture). Models are available for flows up to 65L/minute. The flows shown below are typical, however we recommend that a water analysis is carried out to ensure that the correct unit is selected.

PART #	TANK SIZE	PORTS	FLOW
NF744N	7 x 44	3/4"	10-15 LPM
NF948N	9 x 48	3/4"	15-25 LPM
NF1054N	10x 54	3/4"	25-35 LPM
NF1252N	12 x 52	3/4"	35-45 LPM
NF1465N	14 x 65	3/4"	45-65 LPM

### **OPERATING SPECIFICATIONS**

Pressure Range                      1bar – 7bar  
pH    > 6 \*

\* For lower pH use dolomite and magnesium oxide mix (consult factory)

**LARGER UNITS ALSO AVAILABLE**
