

ULTRA VIOLET TREATMENT SYSTEMS

Large (50 lpm) Capacity Systems

The UV Big Boy series is the most versatile commercial ultra violet disinfection system on the market today. It has a convenient manifold mounting rack, which can be used to configure up to three UV chambers in parallel, or in series. This allows the user to achieve a higher flow rate, and provides easy access for cleaning and maintenance.

FEATURES

- Commercial, residential and industrial applications
- Stainless Steel UV Chamber
- Easy to Install and maintain
- Chemical free
- Pure and natural as the sun
- Economical
- Kills Bacteria and Viruses
- Sediment and carbon filtration (*Double or triple models*)
- Electronic lamp indicator (LED)
- Optional "Lamp out" alarm circuit
