

## **AUTOMATIC RESIN CLEANING SYSTEM**

***Using ResinMate will increase the effectiveness and extend the life of your water softener!!***

One of the largest causes for water softener service calls is the fouling of the softener's resin bed. Iron and other mineral particles build up on small resin beads and clog it's microscopic pores. This greatly reduces the efficiency of the softener ,which in turn wastes salt and money. The **ResinMate** resin cleaning system automatically removes these buildups ,and keeps them from coming back. **ResinMate** also keeps the softeners operating parts and valves free of mineral build up.

- Reduces Resin Bed fouling
- Fully Automatic
- Meters the proper amounts of ResinMate solution needed each time your softener regenerates
- Can be installed in virtually any softener
- Increases softener life
- Decreases salt consumption

PART #	DESCRIPTION
APP41	ResinMate Cleaner
APP42	ResinMate Feeder (Yellow) 14ml/day
APP43	ResinMate Feeder (Clear) 28ml/day

**CAUTION!** Do not mix or use ResinMate solution with: Acid cleaners, Chlorine bleach or any other household cleaning products
