## PIPE SANITATION

***The new Chlorastick pipe sanitizing system is a must for all UV and point-of-entry installations***

*To get rid of downstream contamination, most UV manufacturers recommend that installers sanitize the pipes whenever a UV system is installed. Now, we bring you the tools to do this job simply, safely and effectively and there is no mess, no liquid chemicals, and no chemical handling.*

*The Chlorastick system makes repeat sanitation easy. Every time the lamp/filters get changed, or the unit is serviced, the pipes can quickly and efficiently be re-sanitised*

**Quick change Chlorostick cartridges allow re-sanitising of the pipes whenever required**

### THE SYSTEM INCLUDES:

- 1" Ball valves
- Quick release union fittings with O'ring seals
- Disposable, clear chlorine pallet chamber
- Sch 80 PVC replacement pipe

PART #	DESCRIPTION
APP65	Chlorastick System
APP65RC	Replacement Cartridge
