

IRON & MANGANESE PROBLEMS? DIRTY POND OR DAM WATER?

**WE HAVE THE SOLUTION!!
WITH THE UNIQUE "MAGNUM" SYSTEM
DESIGNED AND MANUFACTURED IN
NEW ZEALAND**

Anthony Preston Limited has been in the filtration and separation industry since 1951 and has designed and developed the revolutionary iron & manganese and turbidity removal systems known as the "MAGNUM" in response to the many unreliable systems currently on the market.
**PROVIDING SOLUTIONS
MATCHED TO YOUR NEEDS**

**IRON & MANGANESE SYSTEM
FOR BORE WATER**

**TURBIDITY REDUCTION
SYSTEM FOR POND/DAM WATER**

Magnum Features and Benefits

- ☑ Eliminates costly blockages in pipes, valves, ballcocks, drip irrigators etc
- ☑ Cleaner troughs and tanks equals less maintenance
- ☑ Healthier drinking water for animals equates to increased production and reduced health problems
- ☑ Reduced milk gradings
- ☑ Elimination of staining
- ☑ No more daily raking as with old fashioned NDA style manual systems
- ☑ Long life media compared with other systems, reduces maintenance costs

Our experience is your guarantee
