

# **COPPER/SILVER IONIZERS**

## **UTILISATION OF THE COPPER/SILVER IONISATION PROCESS FOR WATER DISINFECTION—THE LEGIONELLA KILLER!!**

For use in hospitals,retirement homes,medical centres etc. for safeguarding against Legionella outbreaks in water cooling towers,water supply pipework etc.

Now being used widely in hospitals in the USA.  
Recent events in Christchurch,NZ show there is now a ready market for this product.

Different from pool/spa ionisers in that they are designed to operate at domestic hot water temperature,with a varying flow rate.

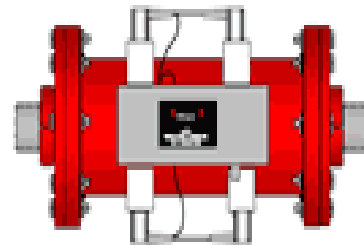

No handling/mixing of dangerous chemicals!!!

Example of a typical installation

Controller Unit

Electrodes
