

WATER SOFTENING FOR POOL AND SPA

Solve your hard water problems without chemicals, salts or maintenance !!

Specially designed to treat incoming water containing calcium and other minerals in solution. “Scaleblaster” works by using a complex inaudible magnetic signal, at sonic frequencies, which causes turbulence in the water molecules, and ion exchange in mineral atoms. The crystals are then unable to adhere to the pool walls and do not precipitate out as hard scale.

- Helps stabilise pH
- Gives water “ Silkier” feeling
- Removes scale from Pool walls
- Helps prevent and remove stains
- Reduces oxidizer use
- Requires no maintenance !!

SIZE	PART NUMBER
