

## THE FIRST LINE OF DEFENCE AGAINST WATER DAMAGE

## Leak Controller a Specialized, Affordable Water Alarm and Shut-off System

## \*\*\*Features and Benefits\*\*\*

\*Microchip technology for sensitive controls, operation verification and long battery life

\*Status Test Button

\*LED Status Indicator

\*Audio Alarm

\*Powered by 4 AA batteries no external wiring required

\*Programmable service reminder

\*Automatic shutoff ball valve with manual reset dial

\*1/4" to 3/8" quick connectors for use with copper or plastic tubing

\*\*\* Ultra sensitive water sensors

Connected to one controller, multiple sensors can be installed for protection in several areas

Leak Controller will engage the shutoff valve and sound an alarm upon sensing of moisture, thereby cutting off the water source and stopping the leak.

The alarm will sound until the valve is manually

reset.

By preventing continuous water flow, mould and property damage is kept to a minumum.
