

## ULTRA VIOLET TREATMENT SYSTEMS

### Small (40 lpm) capacity Systems

The patented PURA UV20 series is designed to provide disinfected water at a flow rate of 35-40 Litres per minute. This system is ideal for whole house water treatment. In addition to disinfection, the double and triple sump models provide filtration for the removal of sediment and chemical contaminants. The whole house UV disinfection system makes a perfect companion to Water Softeners, RO and Ozone systems.

### FEATURES

- Stainless Steel UV Chamber
- Easy to Install and maintain
- Chemical free
- Pure and natural as the sun
- Economical
- Kills Bacteria and Viruses
- Sediment and carbon filtration (Double or triple models)
- Electronic lamp indicator (LED)
- Optional "Lamp out" alarm circuit

**Limiting Valve now available for your UV - phone us for details**

PART #	DESCRIPTION
UV20-1	20" Single Sump UV Steriliser only
UV20-2	20" Twin Sump UV Steriliser + EPM20 10 micron Carbon Block
UV20-2G	20" Twin Sump UV Steriliser + R1-20 1 micron pleated filter
UV20-2-12V	20" Twin Sump UV Steriliser + EPM20 10 micron Carbon Block <b>12 Volt</b>
UV20-3	20" Triple Sump UV Steriliser + SD5-20 String Wound 5 micron filter + EPM20 10 micron Carbon Block
UV20-3G	20" Triple Sump UV Steriliser + NCP20 pleated Carbon filter + R1-20 1 micron pleated filter
UV20-3-12V	20" Triple Sump UV Steriliser + SD5-20 String Wound 5 micron filter + EPM20 10 micron Carbon Block <b>12 Volt</b>
UV20-3CBC	20" Triple Sump UV Steriliser + SD5-20 String Wound 5 micron filter + CBC20 0.5 micron Carbon Block
